1 right date.

2 So audio recordings started with the pilot  
3 in 2016, then we continue with other pilots in 2018,  
4 and then we officially launched the in-app  
5 feature -- you know, the closest version of what we  
6 have today in 2019.

7 Q. And with the audio feature, this -- does  
8 Uber set the parameters for how long the audio  
9 recordings are preserved?

10 A. It's very similar to what I've explained  
11 to the video recording. It stores it for  
12 seven days. It gives you a notification a couple of  
13 days before and reminders, you know, if you want to  
14 submit a ticket with the file, and then it expires  
15 after seven days.

16 Q. All right. And if the driver is the one  
17 who has opted into the audio recording feature, is  
18 that something that is communicated to the passenger  
19 before accepting a ride?

20 A. Yeah. So in the same manner as the video,  
21 there are some legal specificities in different  
22 markets where we -- we call it internal like  
23 one-party consent or two-party consent based on  
24 regulation where we make this notification a little  
25 bit more permanent. But yes, we do notify riders.
